Penn Memory Center at 3400 Civic Center Boulevard the Penn Neuroscience Center / Penn Geriatric Philadelphia, PA 19104 Psychiatry Phone: 215-662-7810 https://pennmemo		The Penn Memory Center is a single, unified Penn Medicine source for those age 65 and older seeking evaluation, diagnosis, treatment, information, and research opportunities related to symptoms of progressive memory loss, and accompanying changes in thinking, communication and personality. They offer state-of-the-science diagnosis, treatment and research, focusing on individuals with Alzheimer's disease, mild cognitive impairment (MCI) and other age-related progressive memory disorders. The Penn Memory Center team are board-certified, experienced physicians specializing in cognitive neurology, geriatric psychiatry, or geriatric medicine, and clinical professionals from disciplines including neuropsychology, psychometrics, nursing, psychotherapy, social work, and research management. Late life is a time of transitions, with increased vulnerability to losses and illnesses that can lead to problems in memory and other cognitive abilities, emotion, and behavior. Their goals are to identify the nature and causes of these common problems in the
